# G DATA & MICROSOFT: THE CLOUD FOR MODERN BUSINESSES THAT COMPLIES WITH GERMAN DATA PROTECTION LAWS

## G DATA is a launch partner for Microsoft Cloud in Germany

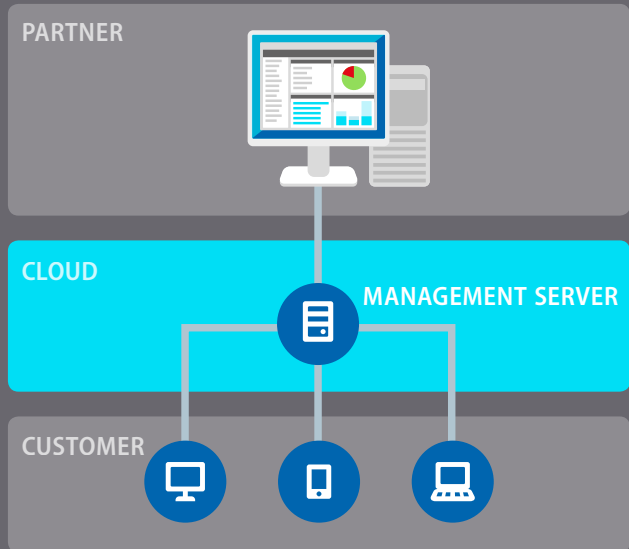

With the Cloud in Germany, Microsoft is offering a solution that meets the strict data protection provisions and compliance guidelines in force in Germany. When the project starts, G DATA will be the only antivirus provider to be represented, with MANAGED ENDPOINT SECURITY – a solution especially adapted to the Azure architecture. Dedicated data centers set up in Frankfurt and Magdeburg guarantee that sensitive corporate data belonging to our partners and customers is always fully protected against third-party access.

## IT Security Made in Germany

MANAGED ENDPOINT SECURITY provides comprehensive protection against viruses and other digital threats for your customers' Windows and Linux clients. The extensive Group Policy Management guarantees adherence to company guidelines, even in complex networks. The optional Patch Management module automatically keeps the software on the clients fully up to date. Offer your customers award-winning IT security as a managed service, so they can concentrate entirely on their core business.

## Managed security in the Azure Cloud

Thanks to Microsoft Cloud in Germany, providing a managed security solution for you as a G DATA partner is now even easier. Offer your customers MANAGED ENDPOINT SECURITY as a virtualized solution and benefit from things such as high availability of up to 99.95%, which you can guarantee for your customers as part of an SLA. In addition, there is no effort involved in operating and maintaining a separate infrastructure for the Management Server.

## Central management console

Each of your customers has a separate Management Server connected to their clients. With G DATA MasterAdmin you can conveniently manage all Management Servers and the associated clients for your customers via a clear, intuitive interface.

# AZURE

## More benefits for you and your customers thanks to Microsoft Cloud in Germany

### Are you already a Microsoft partner?

If you use your own access data for Microsoft Cloud in Germany, you can set up virtualized Management Servers for MANAGED ENDPOINT SECURITY as a Cloud app with just a few clicks.\*

- The only requirement is a valid license for MANAGED ENDPOINT SECURITY, which you can obtain from your G DATA sales partner
- Use the handy free image from the marketplace to set up as many Management Servers for your customers as you want
- The servers are easily managed via your dashboard

### All services under one roof?

So you can concentrate entirely on your customers, we are offering you MANAGED ENDPOINT SECURITY powered by Microsoft Azure as a full service on request.\*

- We take care of the provisioning and scaling of Cloud resources and provide you with preconfigured Management Servers
- Take advantage of the full range of benefits in virtualization, even if you yourself are not a Microsoft partner
- Billing will ensue via G DATA

\* Available after the launch of Microsoft Cloud in Germany in 2016

## We are there for you. Any time.

The development and support teams work closely together in the Bochum head office – for the best, first-hand support, 24/7/365.

### Premium services & support

For even faster, guaranteed response times in case of emergency, we also provide personal contacts and on-site support as PREMIUM SERVICES & SUPPORT SLAs.

## IT security for companies. Since 1985.

G DATA is the antivirus pioneer. For 30 years we have been developing tailor-made, multiple award-winning security solutions in Germany for companies of any size. Modern network monitoring, comprehensive mobile device management and convenient patch management are just a few examples of the numerous good reasons that will convince your customers. At the same time, you benefit from intuitive, mature software that significantly reduces your administrative effort and therefore your costs.
